SUMMARY

Generalist Game Designer with experience across gameplay systems, content design, and production-related workflows. Background includes hands-on game development, project coordination, and localization in international environments. Worked with Unity and Unreal Engine on gameplay mechanics, level design, and platform-specific adaptations. Focused on building clear, scalable design solutions within cross-disciplinary teams.

Currently based in Moscow (Russia), open to relocation.

EXPERIENCE

- | | | |
|--|--|-----------------------|
| 03.2026 – to date | Octo Games
(https://www.linkedin.com/company/octo-studio-g/) | International |
| Generalist Game Designer | | |
| <ul style="list-style-type: none">Designed and documented gameplay systems, progression structures, mini-games, and interactive content for multiple Unity-based projects.Developed narrative structures, character arcs, dialogue flows, quest progression, and conditional content unlocks.Worked directly in Unity to configure gameplay scenes, event sequences, UI behavior, camera logic, video integration, and content implementation.Designed and maintained system rules, progression logic, data structures, and content requirements for programmers, artists, and animators.Collaborated with developers, artists, animators, and producers, preparing design specifications, task briefs, references, and implementation feedback.Contributed to localization workflows, content adaptation, and multilingual implementation across production. | | |
| 03.2025 – 03.2026 | Next Genium
(https://next-genium.com) | International |
| Generalist Game Designer | | |
| <ul style="list-style-type: none">Designed and documented core gameplay systems, including construction mechanics, meta-progression, economy, balance, and player interaction flow.Developed resource loops and progression models (gold, mana, power etc.), balancing sinks and sources to support long-term gameplay.Structured interaction rules for units, objects, and environmental systems using interface-based logic.Wrote clear design specifications for interactive objects, flags, spells, and unit behaviors across multiple gameplay layers.Collaborated across disciplines with developers, artists, and producers, ensuring design consistency, providing task briefs, reference boards, and iterative feedback for implementation feasibility in Unreal Engine. | | |
| 07.2024 – 02.2025 | Mirra Games
(https://mirragames.com) | International |
| Unity Developer / Game Designer | | |
| <ul style="list-style-type: none">Successfully ported dozens of games to web platforms, including Yandex.Games, GamePush, Poki, GamePix (etc.), ensuring compatibility and performance.Optimized game code to improve performance and meet platform-specific requirements.Adapted projects for target platforms by integrating APIs, implementing monetization features, and customizing UI/UX. | | |
| 01.2020 – 07.2022 | Logrus IT
(https://www.logrusit.com/en) | Russia, Moscow |
